How to run the Food Waste Management Project

1. Download Project implementation code folder

2. Paste inside root directory(for xampp xampp/htdocs, for wamp wamp/www, for lamp var/www/Html)

3. Open PHPMyAdmin (http://localhost/phpmyadmin)

4. Create a database with the name fwmsdb

5. Import is fmsdb.sql file (given inside the zip package in SQL file folder)

6. Run the script http://localhost/fwms

Software Used

Xampp - XAMPP is a free and open-source cross-platform web server solution stack package developed by Apache Friends, consisting mainly of the Apache HTTP Server, MariaDB database, and interpreters for scripts written in the PHP and Perl programming languages. Since most actual web server deployments use the same components as XAMPP, it makes transitioning from a local test server to a live server possible.
